

23rd November, 2022

The Principal of Dhanekula Institute of Engineering & Technology,
Vijayawada

Namaskaram

- Sub: World Soil Day, 5th December Walkathon/ Standathon at Dhanekula Institute of Engineering & Technology.

Save soil is a global movement that is begun to revitalize the soil and restore it to a healthy state, with a minimum of 3% organic content.

There is a rising urgency in the world to address the issue of soil and restore it for the future generations and the world answered the same. Save soil movement has gained massive popularity and it has now become the world's most followed social movement.

During the 100 days lone motorcycle journey of 30,000 kilometres, Sadhguru has attended 691 events, and received support from over 3.9 billion people across the world.

When we started out a few months back, we knew that children had to play a role in this campaign, but never could imagine the impact they would create in such a short time. Three million children have written letters to Our Prime Minister, Shri. Narendra Modi, addressing to Save Soil. The letters were showcased at Delhi, Sadhguru and our PM walked through the alleys with letters displayed.

In another instance, the President of the United States, Joe Biden responded to a child who wrote a letter to him asking to save our soil, he replied, promising to take action. Many more such laudable incidents filled our journey, for which we are thankful to all our dear children.

The future belongs to the children and without enriched soil there is no future, these simple words have been grasped with great dept of understanding by all these young minds which indeed helped to propel the impact of save soil which is still on. Today 81 countries support save soil, and 11 Indian States signed an MOU - Memorandum of Understanding. Such grand achievement in such a short time is commendable.

We shall celebrate the coming 2 months, and keep the momentum on as we rekindle our campaign from the 22nd of November to 23rd of January. With a focus on World Soil Day - December 5th, we are planning walkathons across the planet.

In this context, We seek your permission to conduct the Walkathon / Standathon around your campus.

Keeping our previous collaboration in mind, We invite you to be a part of our celebrations. Join us once again, and experience the joy of working together to create a conscious planet.

#savesoil. Let's make it happen!
Pranam,
Isha volunteers.

Namaskaram,

We would like to extend our heartfelt gratitude for your support in making the Conscious Planet - Save Soil Movement, world's largest Ecological Movement by the people. It gives us immense pleasure to share that your valuable contribution has played a vital role in catalyzing the leadership of the country towards the grave crisis of Soil Degeneration.

Some of the never before touched milestones were established worldwide through the movement:

- Over 3.9 billion people across the world were mobilized and participated in the movement.
- Near 3 million children in 63 countries wrote letters to their national leaders.
- Around 81 countries have signed the Save Soil MOUs
- Many global influencers like His Holiness The Dalai Lama, His excellency Dr. Mohd. Bin Abdul Karim, Al-issa, Secretary General of Muslim World League and global organizations like The UN, World Food Program, World Economic Forum, WHO and scientists have extended their support to the Save Soil Movement .
- Rally for Rivers

Please watch the following video to know about the Save Soil journey till now.

<https://youtu.be/YHS8TI89Uus>

The exemplary success of the preliminary phase of the SSM endows upon us greater responsibility to keep up the momentum and strive till the necessary policy changes happen across countries.

And for this, we seek your extended support in keeping the momentum up in this endeavor.

Going forward, there are various avenues through which we can continue involving students to the Save Soil Campaign, making them more attuned to Ecology and Environment.

We would really be glad to engage with the students through various activities. We are open to your ideas and suggestions in this direction, to make the engagement more nurturing and impactful for our students.

We wish you the very best and look forward to our warm association in Restoring our Soil.

"If we have any love for our children, we have to leave our soil and water in a better condition than they are now." Sadhguru

Pranam
